

Alfalfa

The following protocol is the recommended applications of 3 Tier Products for the establishment and/or maintenance of alfalfa. This protocol applies to normal field conditions. Fields with severe nutrient deficiencies, high salts or poor soil conditions may require additional supplements to regain peak viability.

Field Establishment:

Following normal field cultivation, preparation and seeding, apply/inject 32 ounces of Establish 5-16-12 mixed with 64 ounces of Huma-Balance XL w/Bio-Cat Booster per acre in a minimum of 20 gallons of water per acre. Solution can be applied either by mechanical broadcast application directly to the soil or injection through irrigation. Direct contact to seed is recommended

After first cutting, follow the normal maintenance regiment described below.

Field Maintenance: (Established Fields)

Spring & After Last Cutting of the Year: Apply either 32 ounces of Maintain 8-16-8 or Growth 16-4-8 with 64 ounces Huma-Balance XL w/Bio-Cat Booster per acre mixed in a minimum of 20 gallons of water.

After Each Cutting Through Season: Apply either 32 ounces of Maintain 8-16-8 or Growth 16-4-8 with 64 ounces Huma-Boost per acre mixed in a minimum of 20 gallons of water.** Repeat this application after each cutting.

Note: For best response, wait 6 – 8 days after cutting to make application. 3 Tier Products **do not require irrigation or rainfall to be effective. 3 Tier Products can safely be applied even during summer heat without fear of plant burn

Estimated Cost Per Application Per Acre (Pre-Mixes Available):

- Establish 5-16-12 & Huma-Balance XL w/Bio-Cat Booster = **2.5/\$32.00 Tote/\$26.25**
- Maintain 8-16-8 & Huma-Balance XL w/Bio-Cat Booster = **2.5/\$32.00 Tote/\$26.25**
- Maintain 8-16-8 & Huma-Boost = **2.5/\$23.00 Tote/\$17.45**
- Growth 16-4-8 & Huma-Balance XL w/Bio-Cat Booster = **2.5/\$29.50 Tote/\$26.00**
- Growth 16-4-8 & Huma-Boost = **2.5/\$20.50 Tote/\$17.20**
